INTEVIA

INNOVATE | INTEGRATE | ELEVATE

RFID SOLUTIONS & IoT DEVICES.

We design, develop, and integrate technologies that power real-world operations.

01 | IOT SOLUTIONS

Design and deliver IoT solutions with carefully selected hardware tailored to your applications.

02 | RFID APPLICATIONS

Plan and prepare for successful deployment of RFID applications across your operations.

03 | RFID TECHNOLOGY SUPPORT

Provide expert consultation and hands-on support for RFID technology — from planning to live operations.

04 | CUSTOM DEVELOPMENT & INTEGRATION

Deliver customized development that is scalable and seamlessly integrated with third-party systems and your existing platforms.

ACCURATE VISIBILITY

Real-time tracking of assets and operations.

RELIABLE TECHNOLOGY

Proven technologies built for performance in demanding environments.

SCALABLE SOLUTIONS

Flexible solutions that grow with your business.

SEAMLESS INTEGRATION

Work seamlessly with your systems and workflows.

WHY INTEVIA

01 | IOT SOLUTIONS

Providing IoT solutions with specific hardware selections tailored to your needs.

02 | RFID APPLICATION DEPLOYMENT

Readiness for RFID application deployment to ensure smooth implementation and adoption.

03 | RFID TECHNOLOGY SUPPORT

Offering helpful support for RFID technology from consultation to real-world operation.

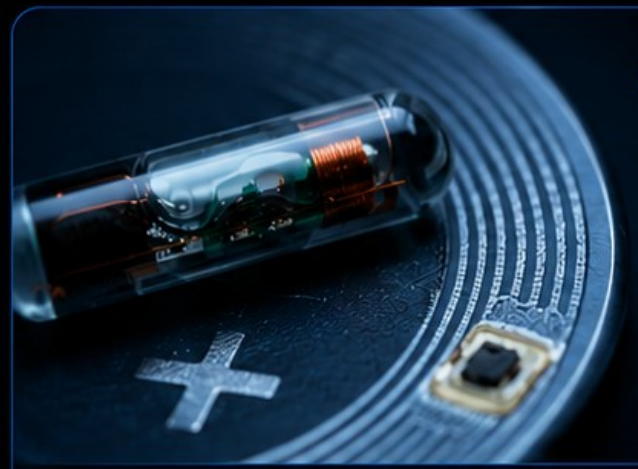

04 | CUSTOM DEVELOPMENT & INTEGRATION

Team-oriented tailored development support that is scalable and third-party integrated to fit seamlessly with your systems.

OUR RFID TECHNOLOGY

Multiple RFID technologies to match the right solution for every industry and application.

"RFID"

Radio Frequency Identification uses radio waves to automatically identify and track objects, assets, or people.

COMPONENTS OF AN RFID SYSTEM

RFID TAG
Attached to objects and stores unique ID/data.

RFID READER
Sends radio signals and reads tag information.

ANTENNA
Facilitates communication between tag and reader.

SOFTWARE
Stores, processes, and integrates data.

DIFFERENT TECHNOLOGIES FOR DIFFERENT APPLICATIONS

Choose the right RFID technology to achieve optimal performance.

LF — Low Frequency

Low Frequency (LF):

- Frequency: 125–134 kHz
- Read Range: Short (cm.)
- Use: Ideal for animal identification, access control, and embedded systems

Best for
Animal ID, Access Control, Embedded

HF — High Frequency

High Frequency (HF):

- Frequency: 13.56 MHz
- Read Range: Short (cm.)
- Use: Ideal for smart cards, contactless payments, and document management

Best for
Smart Cards, NFC, Payments, Documents

UHF — Ultra High Frequency

Ultra High Frequency (UHF):

- Frequency: 860–960 MHz
- Read Range: Long (meters)
- Use: Ideal for asset tracking, logistics, inventory management, and retail

Best for
Asset Tracking, Logistics, Inventory

INTEVIA selects the right RFID technology to deliver higher efficiency, accuracy, and long-term value for your operations.

WHY NFC?

SIMPLE INTERACTION. POWERFUL APPLICATIONS.

NFC (Near Field Communication) enables secure, contactless interactions between devices over a short distance, making processes faster, easier, and more efficient.

01 SIMPLE

Tap. Identify. Connect.

One tap is all it takes to identify products, devices, or information instantly.

02 CONTACTLESS

No Plug. No Manual Entry.

Eliminate manual data entry and physical connections. Save time and reduce errors.

03 SECURE

Short-range communication.

NFC operates at short range, helping you control the interaction within the right context and environment.

04 VERSATILE

From Products to People.

NFC adapts to a wide range of applications.

- Product Authentication
- Asset Identification
- Smart Packaging
- Access Control
- Maintenance
- IoT Configuration

05 INTEGRATABLE

Connect NFC with your existing systems.

Seamlessly integrate NFC data into your ecosystem.

ERP | CRM | IoT | Cloud | Custom Applications

06 EASY TO DEPLOY

Use the device you already carry.

Most smartphones can act as an NFC Reader for many applications, reducing the need for dedicated readers in many use cases.

NFC IS NOT THE SOLUTION BY ITSELF.

INTEVIA turns NFC technology into solutions that work for your business.

- We select the right technology for your business needs.
- We design and develop NFC solutions that deliver real results.
- We integrate systems and data to create long-term value.

FROM TAG TO BUSINESS

RFID SOLUTION ARCHITECTURE BY INTEVIA

INTEVIA designs and delivers end-to-end RFID solutions that connect items to your business systems, driving visibility, efficiency, and real business value.

01 RFID TAGS

Identify and store data on items or assets

Tags / Labels / Asset Tags / Hard Tags / Heat Resistant Tags and more

02 READERS & ANTENNAS

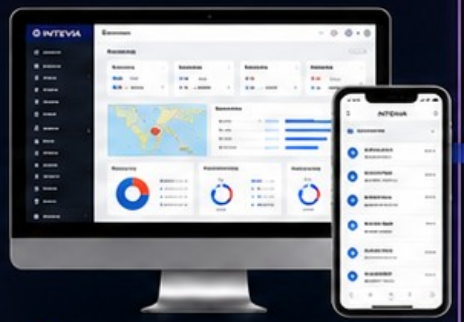

Capture data quickly, accurately, and reliably

Fixed Readers / Handheld Readers / Integrated Readers / Embedded Readers / RFID Gate (Portal) and more

03 RFID APPLICATION

Turn data into insights you can act on

- Asset Tracking
- Inventory Management
- Traceability
- Identification
- and more, tailored to your needs

04 SYSTEM INTEGRATION

Securely connect RFID data to your systems and platforms

- API / Web Service
- Database / Middleware
- IoT Platform / Cloud
- Data Security

05 ENTERPRISE SYSTEMS

Seamlessly integrate with your business systems

- ERP
- WMS (Warehouse Management)
- SCM (Supply Chain Management)
- FAS (Fixed Asset Management)
- WEB / DASHBOARD (Reports & Analytics)

On-premise and Cloud deployments

FROM ITEM VISIBILITY TO BUSINESS INTEGRATION

We turn data into actionable insights and real business value.

IDENTIFY
Identify items or assets with RFID tags

→

CAPTURE
Capture data with readers and antennas accurately and reliably

→

PROCESS
Process and validate data in the application ready to use

→

INTEGRATE
Integrate with your systems and platforms securely and seamlessly

→

ACT
Make better decisions and drive business efficiency and growth

INTEVIA RFID SOLUTIONS

INTEVIA SOLVES INDUSTRIAL CHALLENGES

INTEVIA delivers end-to-end RFID solutions that connect your operations, improve accuracy, and drive efficiency across your industrial processes.

ELIMINATE DISCREPANCIES
Resolve inventory mismatches between **PRODUCTION** and **INVENTORY**.

IMPROVE OUTBOUND ACCURACY
Prioritize outbound operations and reduce picking errors.

REDUCE STOCK COUNTING TIME
Minimize the time required for stock counting.

ENABLE SEAMLESS SYSTEM INTEGRATION
Integrate with ERP, WMS, MES, and other existing systems.

REDUCE RISKS AND LOSSES
Minimize human error, shrinkage, and operational losses.

ASSET & CONTAINER TRACKING
Real-time visibility of movable assets and containers.

PALLET TRACKING
Track pallet movement across your entire supply chain.

INTEVIA

INNOVATE — Create New Value

INTEGRATE — Connect Systems

ELEVATE — Drive Efficiency

RFID

IoT

SYSTEM INTEGRATION

CUSTOM DEVELOPMENT — Tailored to Your Needs

OUR PROJECTS

Product Tracing Platform with an NFC transparent tag embedded in the packaging.

- Ensures product **authenticity**
- Enhance productivity with **AI**
- Fair **commission** on sales
- **Map** based on actual customer data
- Production **forecasting** capabilities
- **Traceability** at any given time

NFC TAG
Embedded in packaging

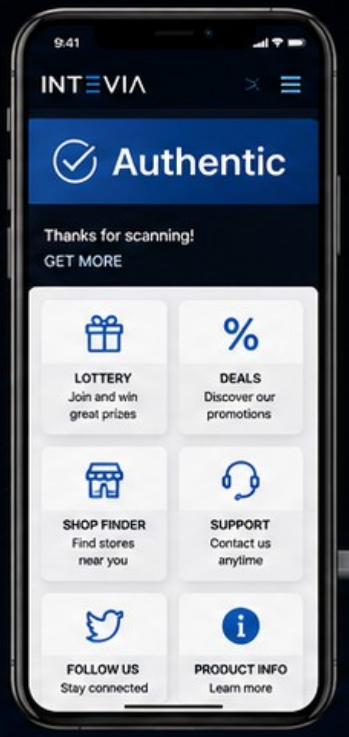

PRODUCTION LINE
NFC tag is encoded and verified

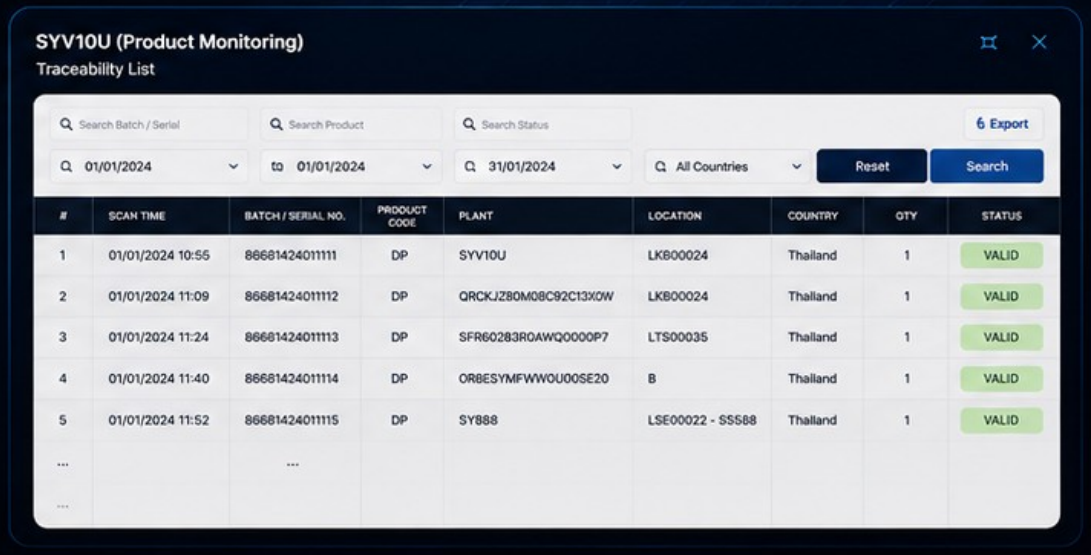

DATA CAPTURE
Real-time data collection

MAP & DASHBOARD
Visualize customer data across Thailand

OUR PROJECTS

INTEVIA
RFID SOLUTIONS

REAL-TIME WAREHOUSE TRACKING

RFID-powered asset and inventory tracking solution for smarter warehouse operations.

- **Real-time visibility**
  Track assets and inventory movement in real-time across the warehouse.
- **Seamless integration**
  Connects with existing WMS / ERP systems for data consistency.
- **Automated tracking**
  Accurate inbound, outbound and movement tracking with RFID.
- **Centralized monitoring & reporting**
  Dashboard and reports for smarter decision making.
- **Mobile-friendly access**
  Access real-time data anytime, anywhere via mobile devices.
- **Operational efficiency**
  Improve accuracy, reduce manual work and optimize warehouse productivity.

SOLUTION ARCHITECTURE

WAREHOUSE MANAGEMENT SYSTEM (WMS) / ERP

Seamless integration with existing systems for accurate data and process automation.

REAL-TIME DASHBOARD

RFID TAG & READER

RFID LABEL / TAG

FIXED READER

HOW IT WORKS

1. **IDENTIFY**
   RFID tags are attached to assets, pallets or inventory.
2. **CAPTURE**
   Readers capture tag data automatically at key points.
3. **TRANSFER**
   Data is transmitted securely to the platform.
4. **PROCESS**
   The platform processes and analyzes data in real-time.
5. **VISUALIZE**
   Real-time dashboard provides complete visibility.
6. **INTEGRATE**
   Integrated with WMS / ERP for end-to-end operations.

BUSINESS IMPACT

- Improve inventory accuracy
- Increase operational efficiency
- Reduce searching time
- Optimize asset utilization
- Support compliance and audit

OUR PROJECTS

SMART HOSPITAL FOOD ORDERING

INTEVIA
RFID SOLUTIONS

NFC-enabled patient food ordering connected to hospital systems

TAP TO ORDER
Patients tap NFC wristband and select meals instantly

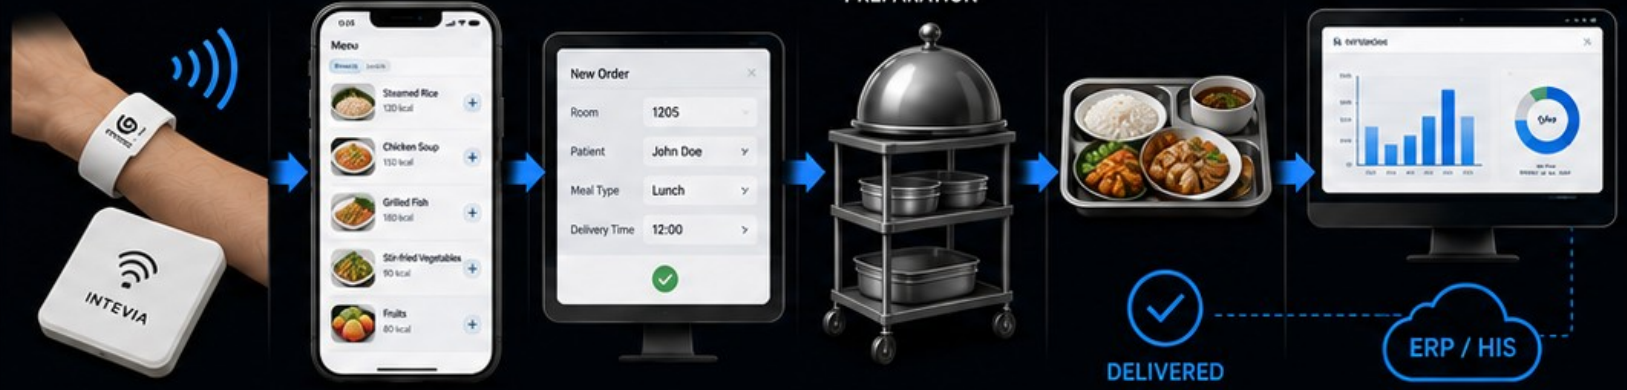

REDUCE ERRORS
Eliminate manual ordering and send data automatically

REAL-TIME TRACKING
Kitchen and staff see order status in real-time

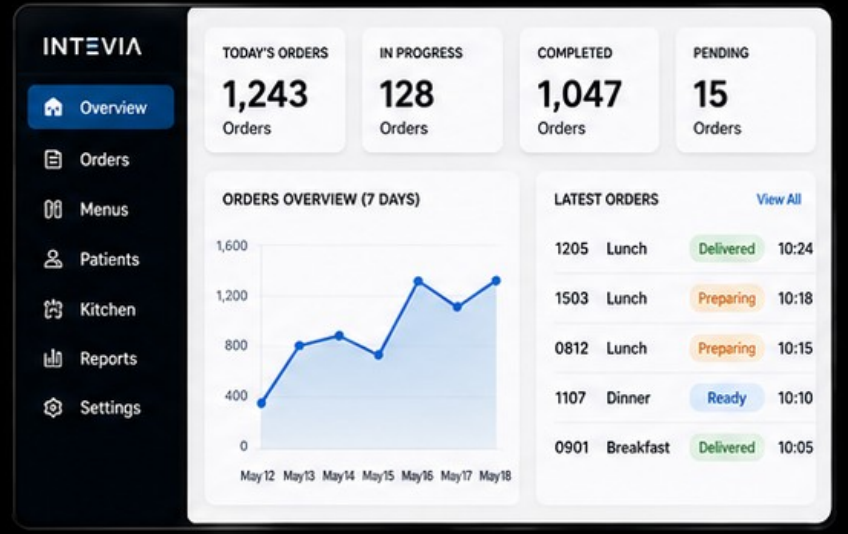

INTEGRATE SEAMLESSLY
Connect with existing ERP / HIS systems

HOW IT WORKS

1. TAP NFC WRISTBAND
2. SELECT MEAL
3. ORDER CAPTURE
4. KITCHEN PREPARATION
5. ORDER DELIVERY
6. DASHBOARD & INTEGRATION

REAL-TIME DASHBOARD

KEY BENEFITS

Reduce Errors
Eliminate manual mistakes

Save Time
Faster ordering and food delivery

Increase Efficiency
Improve workflow and productivity

Data & Reports
Track and analyze anytime

INTEVIA

OUR PROJECTS

RFID INVENTORY CONTROL PLATFORM

Smart tracking. Full visibility. Better control.

INTEVIA
RFID SOLUTIONS

ENHANCE SECURITY
Protect intellectual property and prevent theft.

TRACK & REDUCE WASTE
Use RFID tags on products for accurate tracking and waste reduction.

INVENTORY CONTROL
Scan tags for real-time inventory and product location.

STREAMLINE OPERATIONS
Facilitate product distribution and get real-time status updates.

SYSTEM COMPONENTS

ALARM LAMP

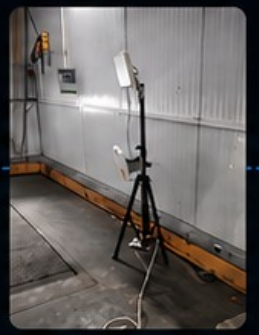

Instant alert for unauthorized access or movement.

ANTENNA GATE (IN / OUT)

Detects and records tags when items pass in or out.

ANTENNA POLE (ZONE MONITORING)

Reads tags in the area for real-time location visibility.

RFID READER

Captures and processes tag data.

CHECKOUT STATION

Verify items and update status at checkout.

INVENTORY CONTROL WEB PLATFORM

- Real-time data & tracking
- Item location management
- Reports & analytics
- ERP system integration

INTEGRATION

ERP / WMS / Other Systems

KEY BENEFITS

Reduce Errors
Eliminate manual mistakes

Save Time
Faster inventory process and distribution

Increase Efficiency
Improve productivity and accuracy

Data & Visibility
Actionable insights anytime, anywhere

OUR PROJECTS

SMART SUPPLIER QUEUE MANAGEMENT

INTEVIA
RFID SOLUTIONS

A comprehensive solution to manage supplier queues efficiently and connect data between Suppliers, Factory and ERP.

1. SUPPLIER
Register & schedule visit

2. SCHEDULING
Book appointment and receive queue

3. QUEUE MANAGEMENT
Manage queue automatically

4. IoT DISPLAY
Show queue status on LED display

5. SAP / ERP
Connect and sync data with ERP

6. DASHBOARD
Monitor and analyze in real-time

KEY BENEFITS

REDUCE DELAYS
Optimize queue process and reduce waiting time

IMPROVE EFFICIENCY
Streamline operations and save time

INTEGRATE SEAMLESSLY
Connect with SAP / ERP and other systems

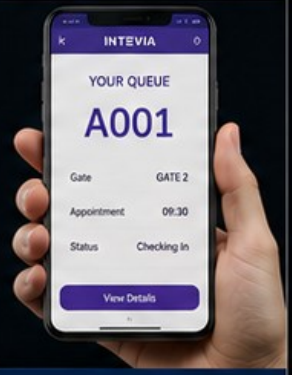

INCREASE PRODUCTIVITY
Enhance service quality and resource utilization

REAL-TIME INSIGHT
Get accurate reports and make better decisions

OUTDOOR LED QUEUE DISPLAY

MOBILE APP

Check queue & appointment anytime

OUR PROJECTS

SMART SUPPLIER QUEUE MANAGEMENT

Manage supplier queue and track products from receiving to delivery in real-time.
Connect Supplier, Factory and ERP seamlessly.

1. SUPPLIER REGISTRATION
Register and manage supplier information

2. APPOINTMENT BOOKING
Book delivery date and time

3. QUEUE MANAGEMENT
Manage queue and delivery process

4. IoT LED DISPLAY
Show queue and status on LED display in real-time

5. ERP INTEGRATION
Sync data with ERP system

6. DASHBOARD
Monitor performance and analyze data

POWER TOOL TAG SOLUTION

SMARTER TOOLS. STRONGER OPERATIONS.

INTEVIA Power Tool Tag Solution uses RFID / NFC technology to identify, track, and manage power tools across their entire lifecycle – from issuance to maintenance and beyond.

- **ACCURATE TRACKING**
- **LOSS PREVENTION**
- **MAINTENANCE MANAGEMENT**
- **DATA-DRIVEN DECISIONS**

NFC / RFID TECHNOLOGY
Fast identification with a simple tap

RUGGED & DURABLE
Built for harsh jobsite environments

SEAMLESS INTEGRATION
Work with existing systems & workflows

WHAT IS POWER TOOL TAG?

A compact RFID / NFC tag attached to each power tool to store a unique digital identity. It enables real-time tracking, status monitoring, and lifecycle management through our integrated platform.

- **RFID / NFC** Dual Technology
- **Unique ID** (UIC / EPC)
- **Waterproof** IP67
- **Impact Resistant** Built for Jobsite

SOLUTION OVERVIEW

TAGGING
Attach RFID / NFC tag to each tool

IDENTIFICATION
Scan with mobile or fixed reader

INTEGRATION
Integrate with ERP, CMMS, or custom systems

DATA CAPTURE
Capture tool data in real time

ACTIONABLE INSIGHT
Monitor, analyze and optimize tool usage

PLATFORM
Centralized dashboard & analytics

KEY BENEFITS

- **Minimize Tool Loss** Reduce theft and misplacement
- **Improve Utilization** Know where tools are and how they are used
- **Extend Tool Life** Schedule maintenance and track service history
- **Operational Efficiency** Streamline tool issuance, return and inventory
- **Cost Savings** Lower replacement and downtime costs

IDEAL USE CASES

- Construction Sites
- Manufacturing Plants
- Maintenance Operations
- Rental Companies
- Oil & Gas / Energy

OUR SERVICES

INTEVIA

SERVICE OVERVIEW
OPERATION & INDUSTRIAL ENGINEERING

We help organizations improve performance and efficiency from analysis and improvement to design and integration across the entire organization.

4 SERVICE PILLARS

01 PROCESS & WORK STUDY

Improve processes and operational efficiency through systematic study and analysis.

- Process Mapping & Analysis
- Time & Motion Study
- Workload Analysis
- Waste Identification & Reduction
- Standard Work Development

Faster Processes
Higher Productivity
Better Performance

02 OPERATIONS RESEARCH & OPTIMIZATION

Use data and analytical methods to find the best solutions for better decision making.

- Capacity & Resource Optimization
- Production Planning & Scheduling
- Inventory Optimization
- Simulation & Scenario Analysis
- Cost & Performance Optimization

Better Decisions
Optimal Resource Utilization
Lower Cost

03 PLANT DESIGN & YIELD IMPROVEMENT

Design efficient production systems and improve yield, quality and overall output.

- Plant Layout & Flow Design
- Material & Production Flow Analysis
- Equipment Selection & Placement
- Process Loss & Waste Reduction
- Yield & Quality Improvement

Higher Yield
Better Quality
Lower Loss

04 BUSINESS & WORKFLOW INTEGRATION

Connect processes, information and systems across departments for seamless end-to-end operations.

- Workflow Design & Optimization
- Cross-Department Integration
- Information Flow Improvement
- System & Data Integration
- Real-time Visibility & Collaboration

Connected Organization
Better Visibility
Stronger Collaboration

COMPANY INTEGRATION WORKFLOW

CREATE ONE WORKFLOW
FOR THE WHOLE ORGANIZATION

One Flow. All Departments. Better Performance.

KEY BENEFITS

- **REDUCE DUPLICATION** — Eliminate redundant tasks and data
- **FASTER PROCESS** — Shorten cycle time and improve speed
- **HIGHER EFFICIENCY** — Improve overall productivity
- **BETTER VISIBILITY & CONTROL** — Monitor and control in real time

ONE INTEGRATED WORKFLOW

01	02	03	04	05	06	07	08
CUSTOMER	SALES	PLANNING	PURCHASING	PRODUCTION	WAREHOUSE	DELIVERY	FINANCE
Understand customer needs	Receive order and collect information	Plan production and allocate resources	Procure materials and manage suppliers	Manufacture according to plan	Receive, store and manage inventory	Deliver products to customers	Invoice and receive payment

Real-time data integration across all processes

WHAT WE DO

1. Analyze current processes
2. Design integrated workflow
3. Align teams across all departments
4. Define standard procedures and rules
5. Implement, monitor and report results
6. Continuously improve for better performance

RESULTS YOU CAN ACHIEVE

- Seamless end-to-end process flow
- Connected data across departments
- Accurate and up-to-date data
- Real-time visibility through key KPIs
- More efficient organization and sustainable growth
